

Issues:

-Can't save the bio under the user setting tab.

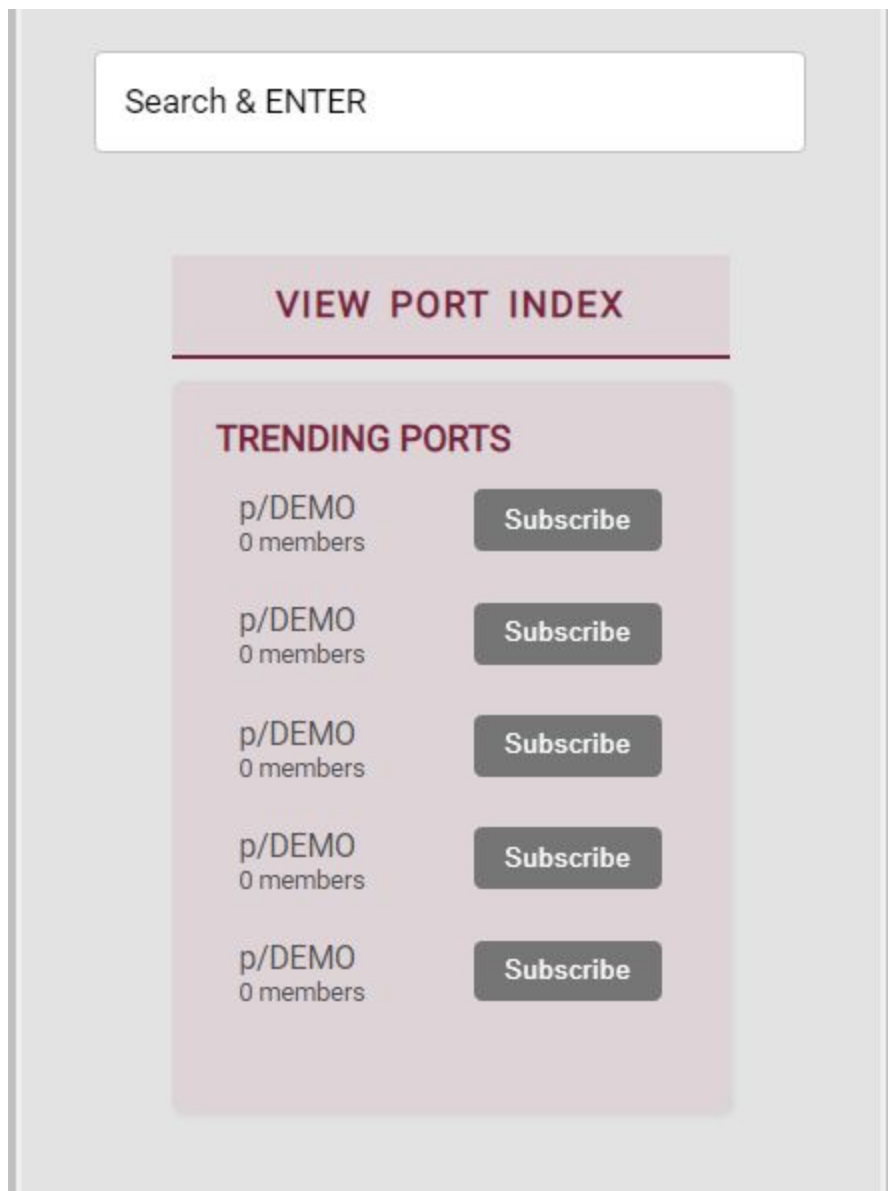

-Can't change email/the hyperlinks for notifications and email and password generates an error

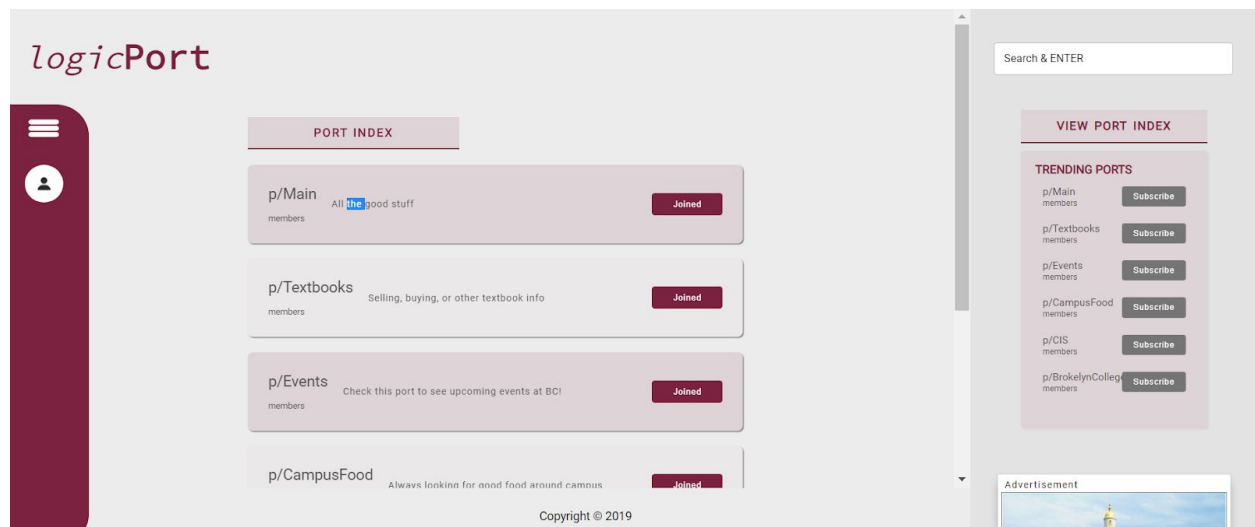

-Dashboard function does nothing

-Search engine still generates error and the port index changes to “DEMO”

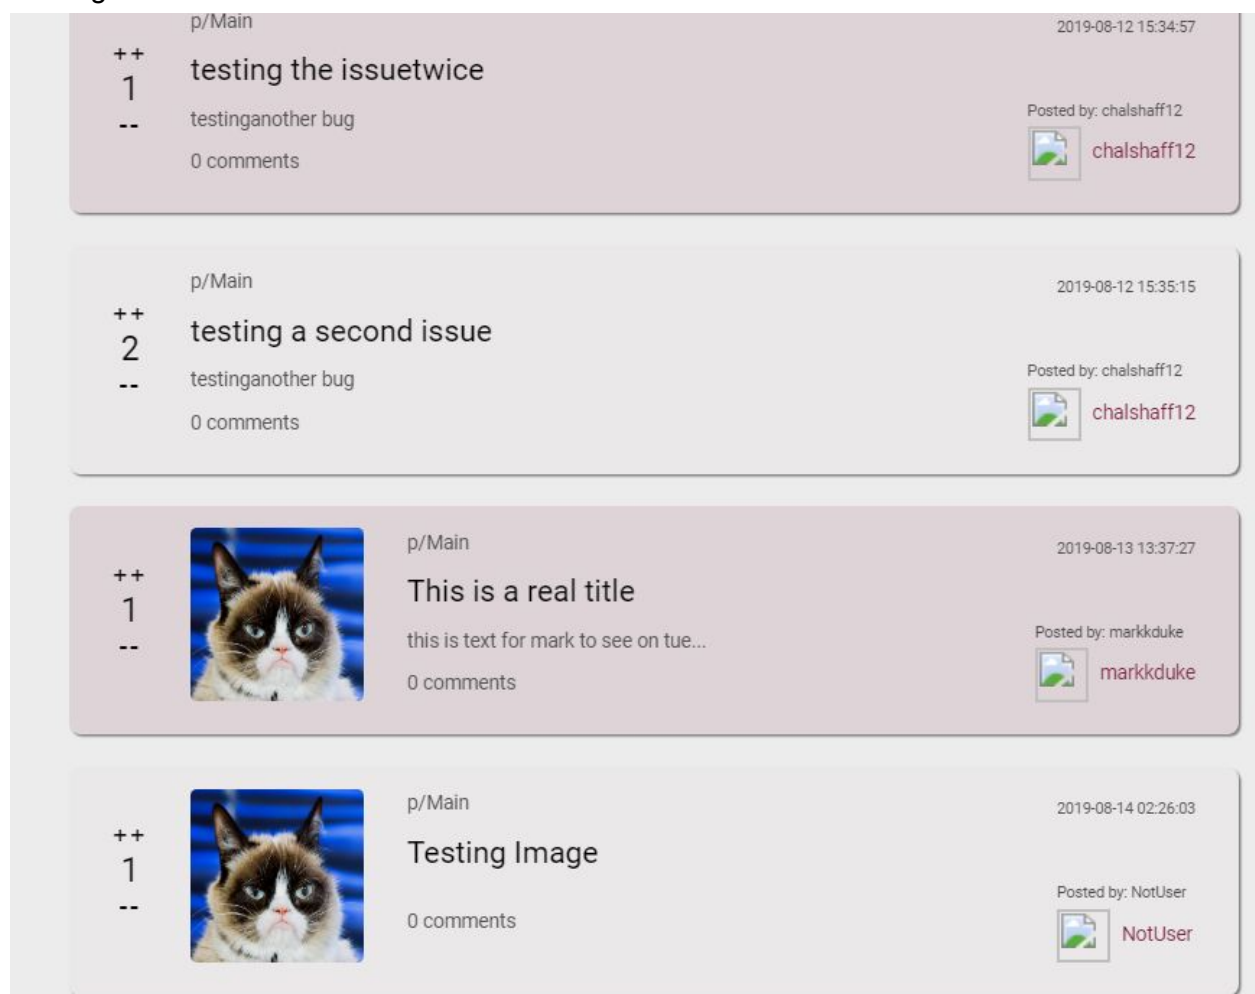

-Although you are subscribed to a page, the port index sidebar doesn't update

-Image URL when creating a post doesn't work

-Adding additional links doesn't work

-Sorting filter doesn't work 405 error

- Unable to view other user's profile (able to click on the hyperlink, but doesn't reroute to the profile)
- No User Image
- Forgot Password button doesn't reroute to anything
